Dr. Jane Henney, Commissioner
US FDA
5600 Fishers Lane 1471
Rockville, MD 20857

Dear Dr. Henney;

The weight of evidence on the inadvisability of introducing antibiotics has been validated. The World Health Organization and the Centers for Disease Control have petitioned the FDA to revoke approvals for existing uses of six antibiotics in animal feed.

As advocates for prevention of all the prenatal developmental disabilities we are urgent that those practices be terminated promptly until the antibiotics are proven truly safe for our developing children, without long range longitudinal immune and endocrine effects.

Sincerely,

Audrey McMahon
